Subject: Boil Water Advisory Lift Notice

Dear Murray Point Water Customer:

As of Saturday, March 6, 2021, the Richland County Utilities Department lifted the boil water advisory issued for Murray Point Subdivision while maintenance work was completed.

Water quality testing confirmed that water is safe for consumption and residents no longer are advised to boil their water before drinking or cooking. Still, customers are encouraged to take the following precautionary measures:

- Run water faucets three to five minutes to flush the service connection and interior plumbing.
- Empty and clean automatic ice makers and water chillers.
- Drain and fill hot water heaters if the temperature is set below 113 degrees Fahrenheit.
- Run service connections with a water softener/cartridge filter through a regeneration cycle or take other procedures recommended by the manufacturer.

The Utilities Department apologizes for the inconvenience caused as a result of the maintenance work on the system. We are here to serve you and welcome any feedback or questions you may have. You may reach us at 803-401-0050
